Hello Google & Friends, I need your help as an Alibi and witness to enter, explore and operationalize the collective conscious/conscience/Super ego". Recently, I have been subject to:
false narrative, defamation, fraud, extortion, outright lies, denials and toxic make-belief. I was hoping your would view my work on YouTube, Facebook and Archive.org and consider partnering with me for a "Real News" (local, independent, non-profit) Reality TV Show, some livestream & some edited into bite episodes: Reminiscent of an inverted Truman Show, where one or multiple characters record & broadcast public matters in public spaces. The plot will allegedly revolve around the investigation into the mysteries of the Soul/conscience, its seeming lack at times when revealing collective crimes against Humanity, while discovering the beautiful and often unheard stories of real efforts many are making without the incentive of
Power, money or greed. This would accomplish several things
1. an unprecedented historical, cultural record
2. a positive, humane, heartfelt change to corrupt cut throat Reality TV
3. A real time, interactive, open-sourced Trust "accountin
4. an example on Transparency for world leaders

Mandate City-Level Development of Emergency Backup Systems
Why this petition matters
As a concerned citizen, I am deeply troubled by our reliance on the global supply chain for basic necessities. This dependence not only exposes us to potential contamination and disease (as witnessed during the COVID-19 outbreak) but also supports unethical labor practices in countries where modern slavery is prevalent. Our current system fails to protect us during emergencies such as disease outbreaks or blackouts, leaving many vulnerable and without access to essential resources like water, heating, food, clothing, and shelter.
To address this issue, we must require our city to research, develop and maintain self-sufficient backup systems(1,2) that can meet citizens' basic needs during major disasters without compromising our local environment or health. These systems should be designed with the capacity to function independently of external aid or resources.
According to the United Nations Office for Disaster Risk Reduction (UNDRR), cities that invest in disaster risk reduction measures can prevent significant losses both in terms of lives and infrastructure (UNDRR Report 2019). Moreover, a study published by the National Bureau of Economic Research indicates that increasing local self-sufficiency can reduce vulnerability to global supply chain disruptions (NBER Working Paper No. 27439).
By mandating these changes at a city level we are not only safeguarding our community against future crises but also taking an ethical stand against exploitative labor practices abroad.
Please sign this petition urging our city officials to prioritize local self-sufficiency through the development of emergency backup systems.
Thank you for your consideration.
(1) self-suf-fi-cient, adjective; needing no outside help in satisfying one's basic needs, especially with regard to the production of food
(2) backup systems include but are not limited to: clean water, food, shelters and essential tool production and delivery systems not reliant on electrical or petroleum powered mechanisms. Some possibilities include but are not limited to harvesting natural gasses from waste systems and incorporating gravity plumbing wherever possible.

I. Child labor is not a negligible social phenomenon in **China**; about 7.74% of children aged from 10 to 15 were working in 2010, and they worked for 6.75 hours per day on average, and spent 6.42 hours less per day on study than other children.

II. Children in **Russia** are found in the worst forms of child labor, including in work on the street and in commercial sexual exploitation.(3a-5a) 3a. U.S. Department of State. III. About 8.3 million **U.S.** workers in 2022 were unauthorized immigrants, an increase from 7.4 million in 2019. The 2022 number is essentially the same as previous highs in 2008 and 2011. https://www.pewresearch.org/short-reads/2024/07/22/what-we-know-about-unauthorized-immigrants-living-in-the-us

IV. Held Hostage by **Coyote Canada** - Undocumented workers are also vulnerable to forced labor in US agriculture. These workers, the vast majority of whom are from Latin America, are typically smuggled or trafficked over the border with Mexico by coyotes, who are in some cases also their labor brokers or employers. Because of their undocumented status, these workers are by nature vulnerable to abusive labor practices and forced labor. In some egregious cases, coyotes hold workers hostage either until their families pay additional money or until they provide a certain amount of labor. https://verite.org/wp-content/uploads/2016/11/HELP-WANTED_A-Verit%C3%A9-Report_Migrant-Workers-in-the-United-States.pdf
